

Supporting grieving children and young people.

Age appropriate loss interventions and practical strategies to promote healing.

Nearly 50% of Australia's children experience the loss of separation or divorce. Their experience to this loss is often minimized or not recognised in the community. Often the focus is on behaviour management for children who are acting out and not on acknowledging their significant loss experience and working respectfully through their losses.

Managing change, loss and grief is an inevitable part of children and young peoples' lives as they deal with issues such as separation, divorce death and other significant loss experiences. This workshop is based on the theory that believes that the better children learn to manage and grow through these changes the more resilient they become as they face further changes in their adult life. A worker's greatest contribution to the success of children or adolescents integration of significant losses experiences is understanding the implications of loss experiences, knowing loss and grief from a child's developmental perspective and strategies of helping children to work through age appropriate interventions will be explored.

Donnelly (2014) argues that parents who surround their children in cotton wool and deny them the

independence and risk associated with growing up also contribute to a lack of resilience and ability to overcome challenges. Loss and change is a normal part of life. We need to start teaching our children constructive ways of holding and healing these losses already in kindergarten.

This workshop draws from the "Seasons for Growth" program which is an Australian grief and loss support program for children and young people. The workshop will invite "story telling" as a strategy and emphasise the important role of feeling, thinking, questioning and deciding and doing in order to heal life's hurts and to bring about change.

Learning objectives of this training:

1. Identify different responses children and young people have to loss.
2. Describe the skills that develop to assist in managing grief reactions.
3. Assess normal loss and grief responses.
4. Explore practical strategies that assist children and young people to come to terms with their loss so to promote healing and growth.

Beate Steller brings over 30 years of experience in a variety of sectors and industries to her role as a principal Training and Development Consultant. Beate also currently works as a Spiritual Wellbeing Co-ordinator in aged and palliative care. She has been an adult educator since 1992, for the Centre for Community Welfare Training, the Australian College of Applied Psychology and Lifeline Sydney. For over a decade Beate has specialised in grief and loss education/counselling and transition counselling and has been on the Board of NALAG (National Association for Loss and Grief) since 2009. She had her first book published in 2017 called *Tech-connect – Staying Meaningfully Connected in Aged Care*. She has both graduate and post-graduate qualifications in Adult Education, Social Work and Nursing, holds a Certificate IV in Assessment and Workplace Training and is currently completing her second Master Degree in Ageing and Pastoral studies at Charles Sturt University. She has worked with people from Indigenous and culturally diverse backgrounds. Beate also holds professional membership with the AASW, the NSW Health Services Profession (as a Registered Nurse), and Spiritual Care Australia.
